Bilateral Meetings

- (13.00 - 15.00)

Description

In our company we are dealing with fire engineering and servicing of fire extinguishers and hydrant network. Regular inspections of fire extinguishers and hydrant network are performed for more than 20 years.

For several years we are offering services as authorized professional person for fire protection. Authorized person for fire protection performs checks on the state of fire protection in buildings, checks and regulates all documents for fire protection, keep records and gives informations about deadlines for inspections of active fire protection systems. Some of our major clients have a sprinkler system, which needs to be regularly maintained and inspected. Due to the lack of providers of these services in Slovenia we are looking for a business partner who performs maintenance and inspections of sprinkler systems.
