Description

Techcool has been operating on the Polish market for over seven years. As specialists, we have a great deal with comprehensive investment services, but also create tailored to customer needs innovative solutions. Our services are used both in public buildings, shopping centers and logistics in the wider food industry etc. Many years of experience make our systems of ventilation, air conditioning and cooling almost irreplaceable. The solutions presented by our specialists are currently in many stores, pharmacies, galleries, halls, centers, warehouses as well as in private homes. Things that distinguishes us from the competitors are high-quality equipment, well-known and reputable manufacturers.
